

FITTING INSTRUCTION

Part Number APG10 & APG11 Arcadian Replacement Cables for Garador Mk3 doors with plastic spring covers.

WARNING As spring tension is on the springs great care should be taken to follow the instructions carefully.

All work is undertaken from inside the garage therefore ensure that all tools required are at hand. You may require assistance with step 3.

- 1 Slide the plastic cover along to one side and remove. remove any pieces of broken cable.
- 2 Insert one end of the new cable over the pulley wheel at the top side of the door and then place a stout screwdriver through the loop at the other end hanging down the side of the door, thread the other end of the cable around the pulley on the end of the spring (thread from top to bottom) then place the loop over the hook near the side of the box.

NOTE: This operation may place a little tension on the spring

- 3 Using the screwdriver pull down on the cable until the spring bracket can be located on its clip within the box.
- 4 Attach the bottom loop to the spindle roller 'G' bracket. Using thick gloves or a cloth to protect your hands, take up the slack on the cable and release the spring bracket. When the spring bracket is released gently allow the spring to take up the slack in the cable. Ensure that the cable does not foul the jamb channel or the door arm.

ALL WORK IS UNDERTAKEN AT THE OWNERS RISK
